

HOME INTRUSIONS HAPPEN EVERY 27 SECONDS!

Your home needs to be a haven. Here's what you can do to protect and secure your home:

Take care of door security. Make sure you have extra bolts and reinforcements.

Windows need to be sealed shut. Use sensors and strong sealants to make it thief-proof.

The best tip: get security cameras and install them in dark hiding spots & popular zones of the landscape.

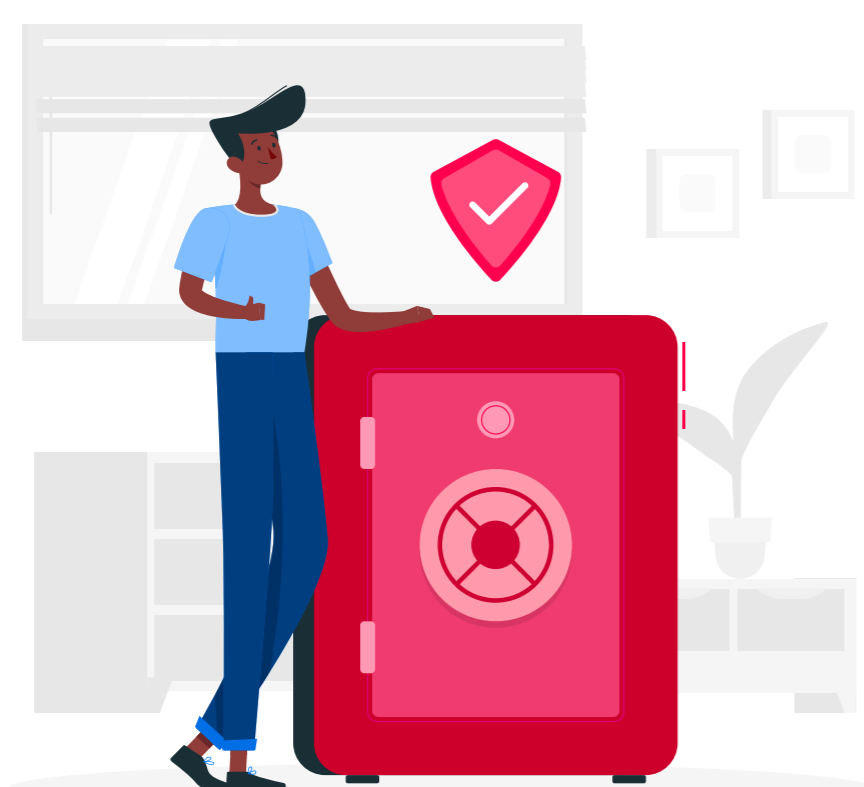

Take care to keep your garage shut from the inside and out.

Install strong, impenetrable wifi security to prevent online thefts and hack-ins

Light up the pathways, dark zones outside the home, and doorways in the night.

Get a robust double-lock safe for your home, either anchored or portable, to keep all the valuables extra secure.
